

# SHOP IT

E-COMMERCE WEBSITE

# SHOP IT

Online shopping is the most recent phenomenon in the Indian online space. Men and women of all ages visit the eCommerce websites regularly and buy the necessities of life.

Men from far and near visit online marketplaces to buy and sell goods. The most striking feature in online market is that it is free of large crowd and noise. A person can visit the online shopping site during his free time and place orders to buy an item.

MEN SECTION

# AIM

We have made this 'SHOP IT' website with the inspiration and Intention to provide users the flexibility to shop anything, anytime, & anywhere which is also the slogan of our website.

We have made this site available 24x7 for all users, also if you want some product in 2-3 days and you don't have time to visit market then you can use our fast delivery feature which made that product available for you within 24 hours

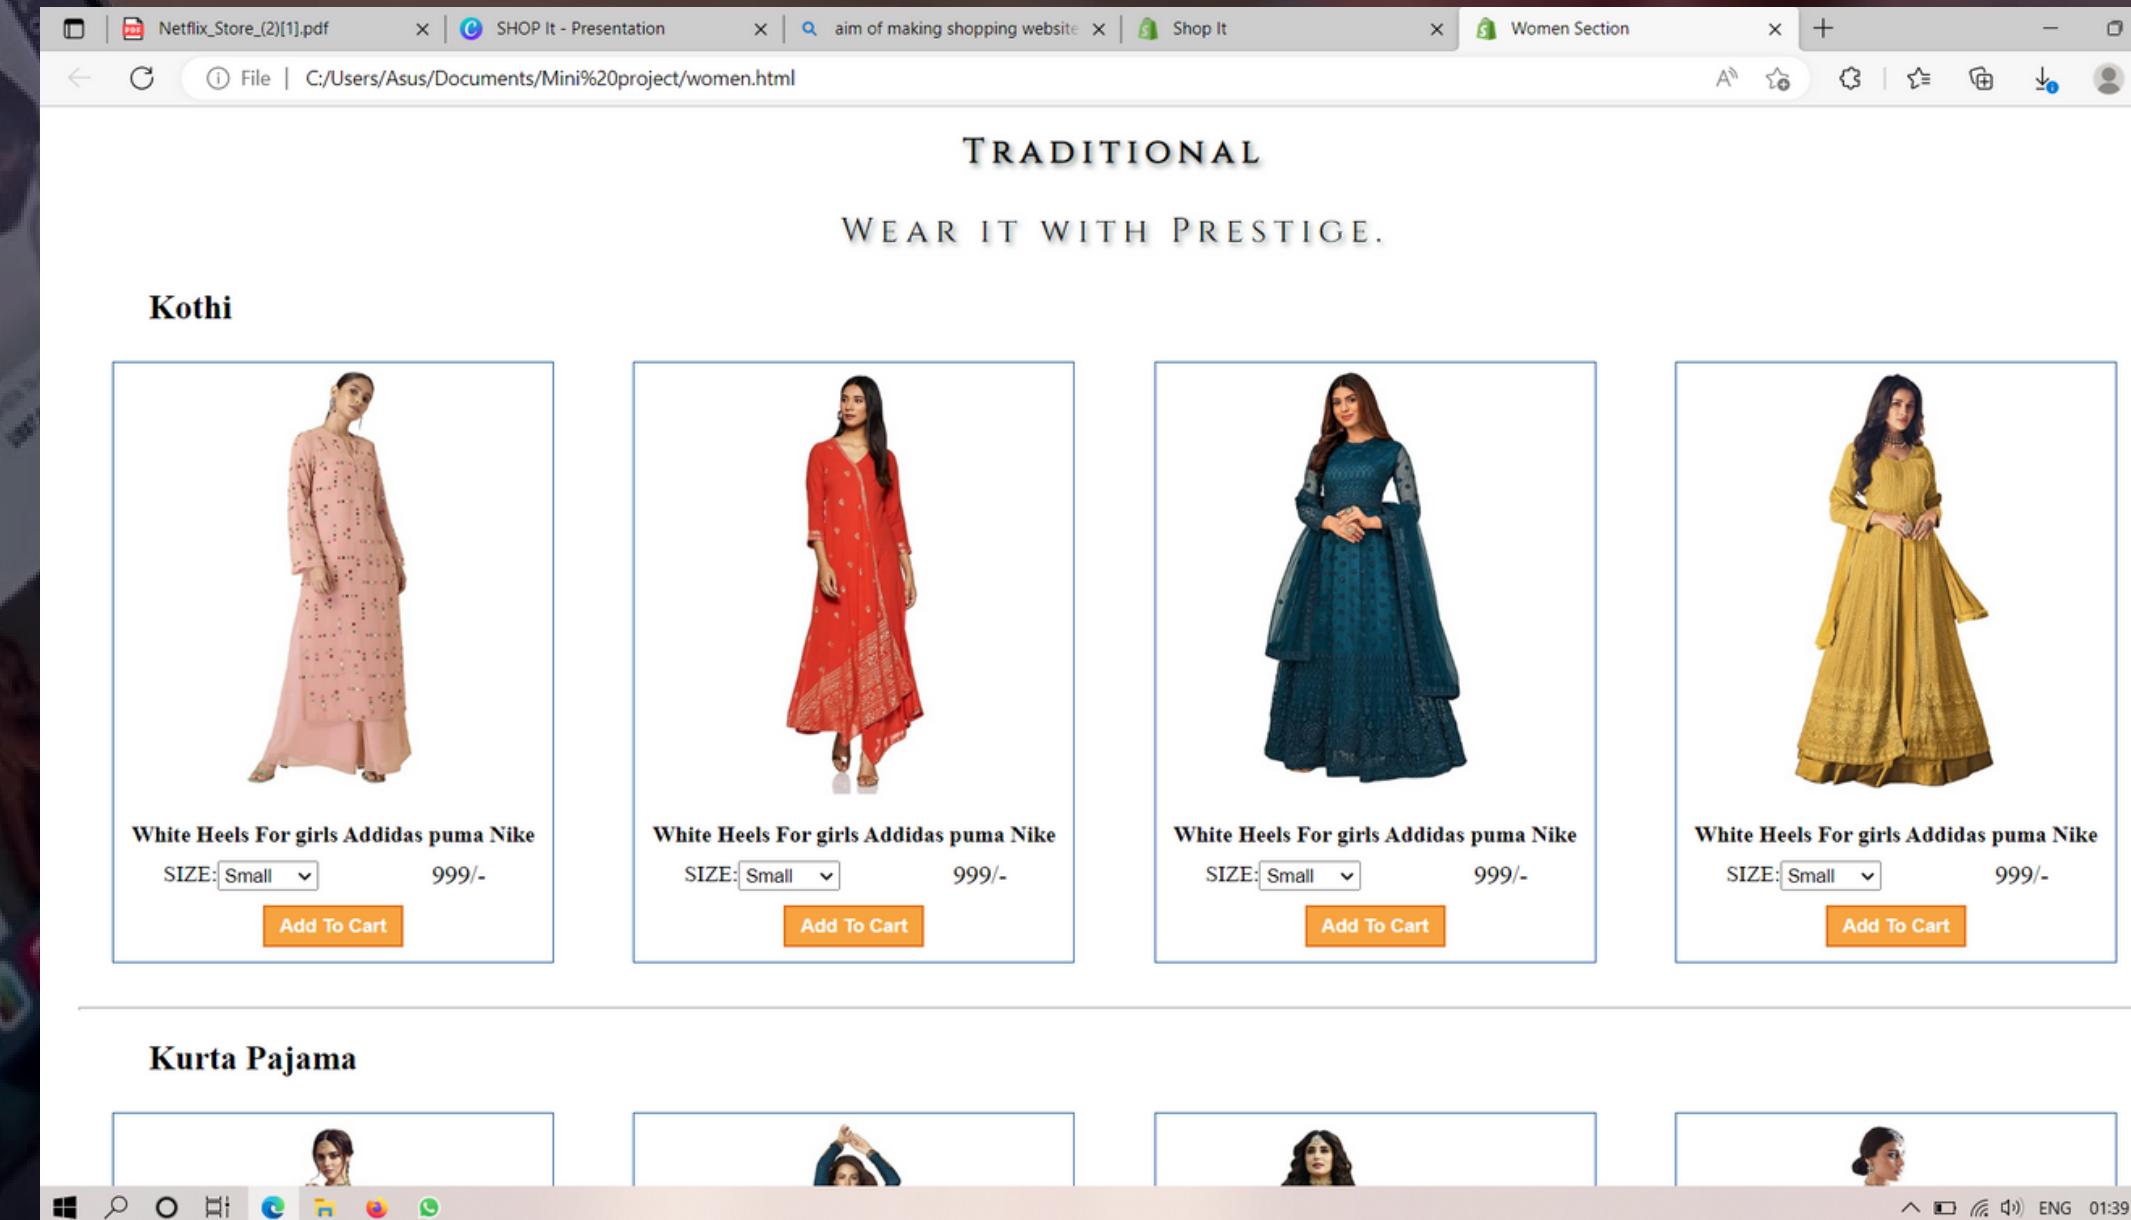

The screenshot shows the homepage of the 'SHOP IT' website. At the top, there's a navigation bar with categories: Men, Women, Beauty, and Electronics. A search bar is also present. The main banner features a woman in traditional attire with a 90% discount offer. Below the banner, there's a large 'SALE' text and a man in traditional wear. The overall theme is 'Traditional Wear' for the wedding season.

The screenshot shows the men's section of the 'SHOP IT' website under the 'CASUAL' category. The heading says 'A CLASSIC NEVER GOES OUT OF STYLE.' Below it, there's a grid of four men's t-shirts. Each t-shirt has a small image, a product name, a size dropdown, a price (999/-), and an 'Add To Cart' button. The products shown are a blue and white striped polo shirt, a dark hoodie with a geometric pattern, a maroon long-sleeved shirt, and another maroon shirt with a geometric pattern.

# OBJECTIVE

The main objective of creating this website is to help grow the small businessman and startups to sell their products, expand their reach, make new customers.

Also there are many embroider whom work is not recognized by many people, also they don't get the valuable amount of their products, so they can sell their products here at a very fine price

GET YOUR CASUALS STARTING UNDER ₹ 299

## USER LOGIN

you can order anything as per your need

# TECHNOLOGIES

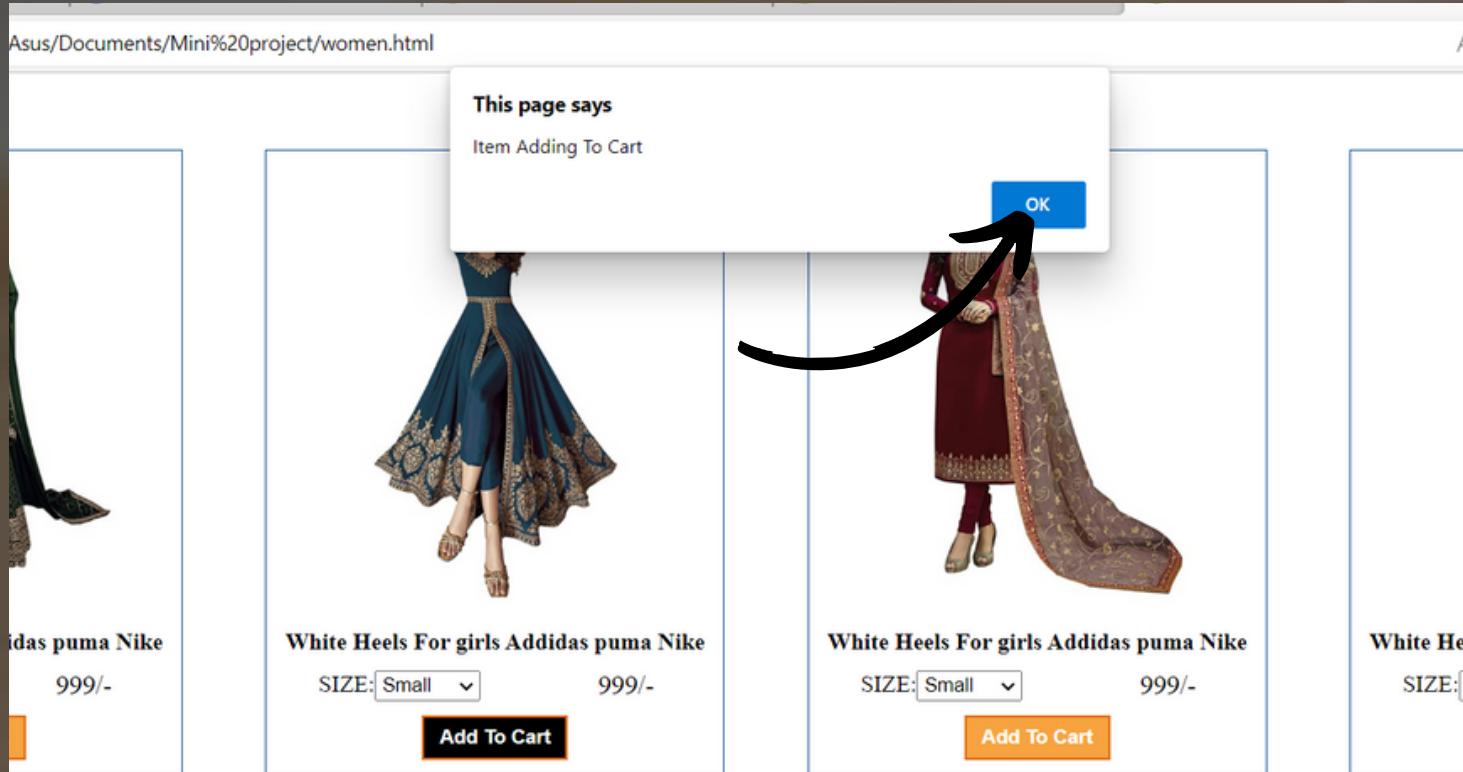

HTML :- It is the standard markup language for Web pages. With HTML you can create your own Website.

CSS:- It is the language we use to style an HTML document. CSS describes how HTML elements should be displayed.

HTML :- It is the world's most popular programming language. JavaScript is the programming language of the Web. JavaScript is easy to learn.

The image contains four screenshots of a web application. The top-left screenshot shows a grid of four product cards for 'White Heels For girls Adidas puma Nike' in size Small for 999/- each, with an 'Add To Cart' button. The top-right screenshot shows a 'CART' section with three items: a bottle of hair serum, a box of hair serum, and a makeup palette, each with a 'Delete' button. The bottom-left screenshot shows a 'Wishlist' page with a message: 'Your Wishlist is empty. Add items that you like to your wishlist. Review them anytime and easily move them to the wishlist.' There is a 'Continue Shopping' button. The bottom-right screenshot shows an 'ABOUT US' page with a large image of a leaf and a list of bullet points: 'We have created a front-end E-commerce shopping website using HTML, CSS, JAVA-SCRIPT, REACT, BOOTSTRAP, and AJAX.', 'The website has all kinds of clothes for men and women both, you can find all kinds of beauty products from basic to expensive, electronic products are also available.', 'Shopping has long been considered a recreational activity by many. Shopping online is no exception. The goal of this application is to develop a web based interface for online retailers. The system would be easy to use and hence make the shopping experience pleasant for the users. The goal of this application is To develop an easy to use web based interface where users can search for products, view a complete description of the products and order the products.', 'A search engine that provides an easy and convenient way to search for products specific to their needs. The search engine would list a set of products based on the search term and the user can further filter the list based on various parameters.', and 'An AJAX enabled website with the latest AJAX controls giving attractive and interactive look to the web pages and prevents the annoying post backs.'

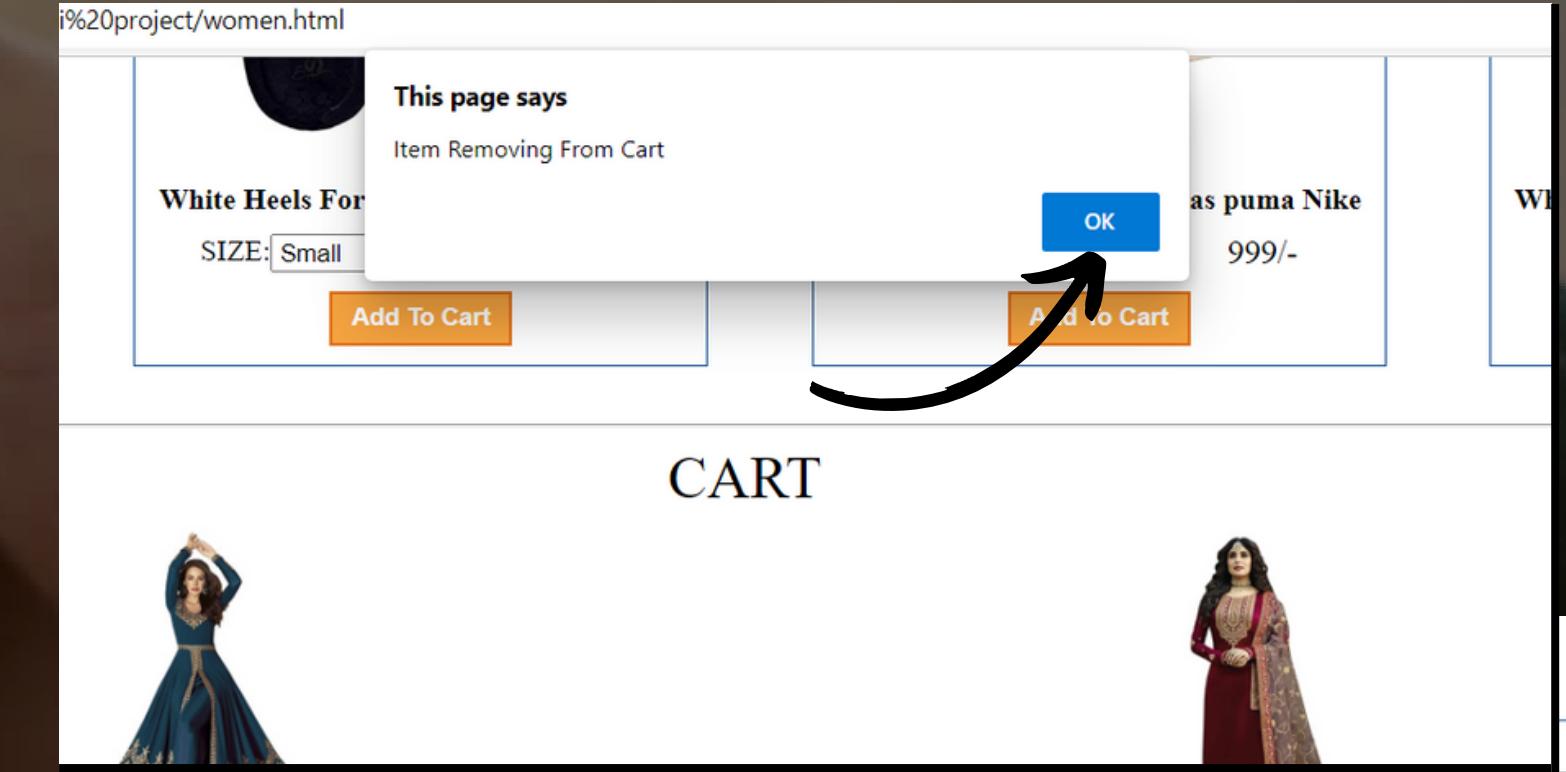

## ADD TO CART

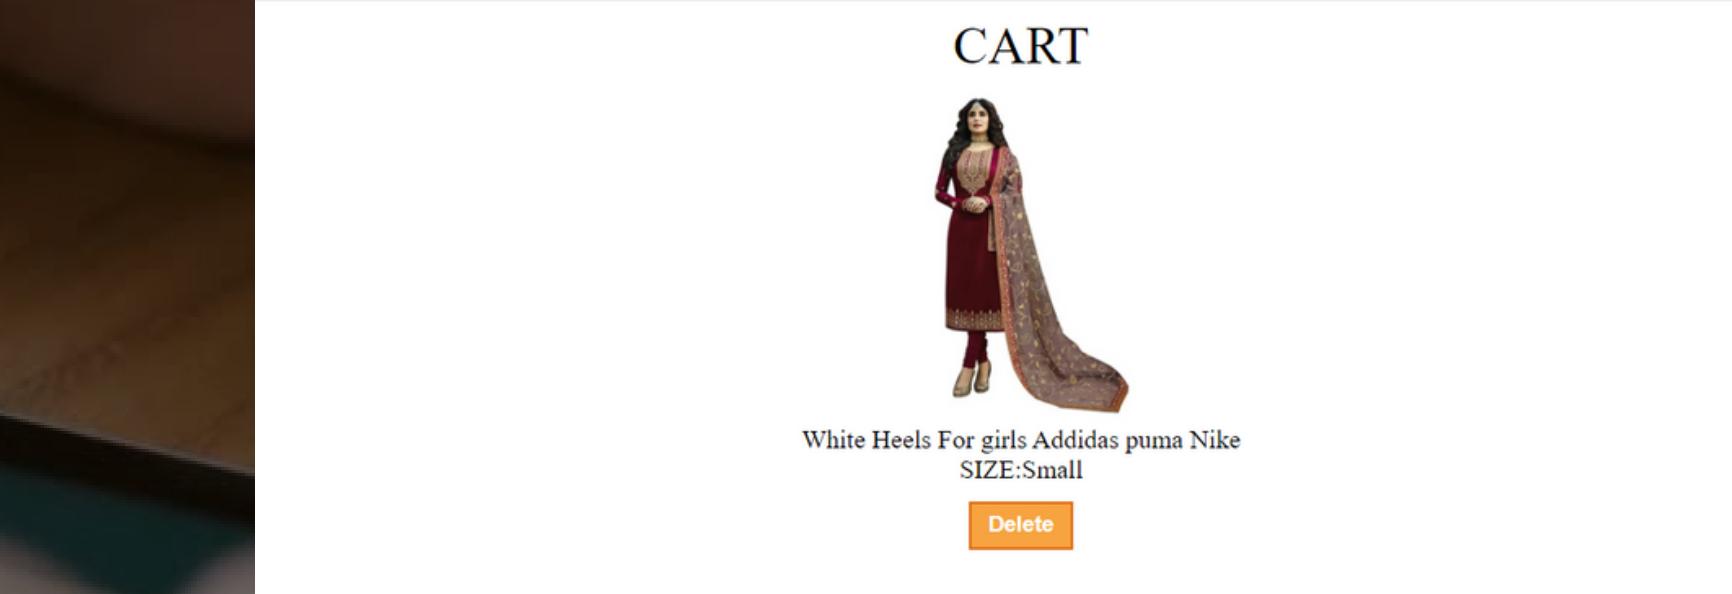

CART

## REMOVE FROM CART

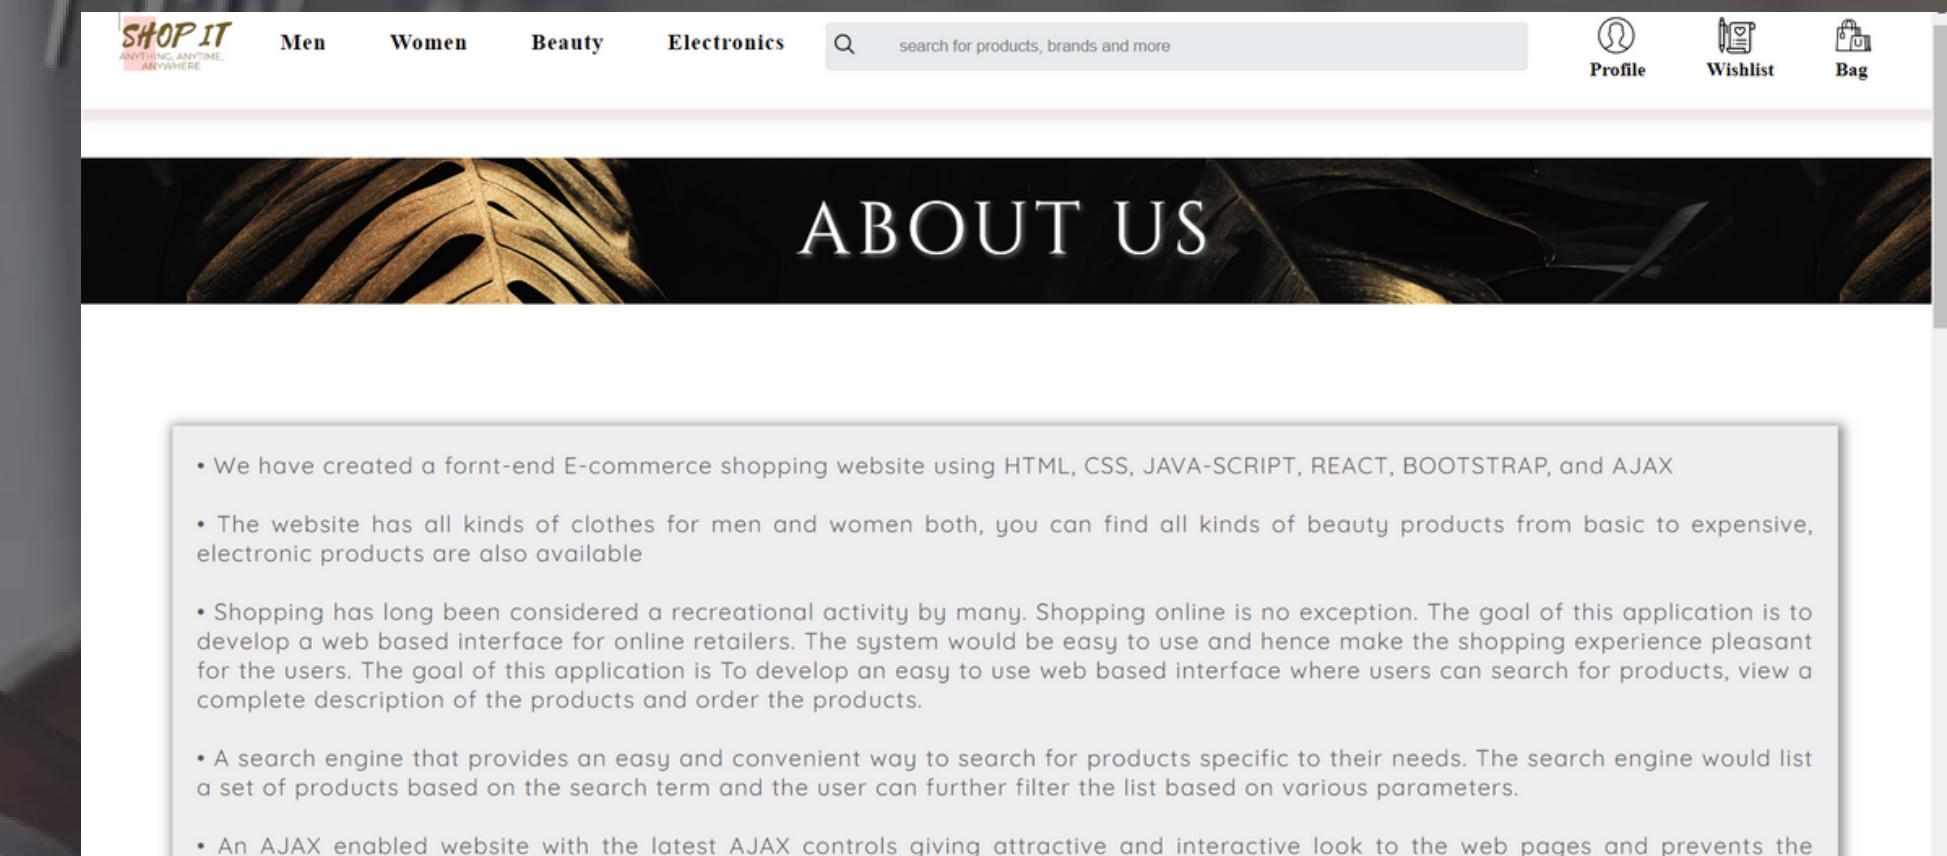

CART

You can add any product to your cart to order it if later on you change your mind then you can also remove that product from your cart

# ABOUT US

In this page we have described that what our website is all about, and also we have mentioned the Developers of the website

• We have created a front-end E-commerce shopping website using HTML, CSS, JAVA-SCRIPT, REACT, BOOTSTRAP, and AJAX

• The website has all kinds of clothes for men and women both, you can find all kinds of beauty products from basic to expensive, electronic products are also available

• Shopping has long been considered a recreational activity by many. Shopping online is no exception. The goal of this application is to develop a web based interface for online retailers. The system would be easy to use and hence make the shopping experience pleasant for the users. The goal of this application is To develop an easy to use web based interface where users can search for products, view a complete description of the products and order the products.

• A search engine that provides an easy and convenient way to search for products specific to their needs. The search engine would list a set of products based on the search term and the user can further filter the list based on various parameters.

• An AJAX enabled website with the latest AJAX controls giving attractive and interactive look to the web pages and prevents the
